

SUNAYANA HAZARIKA

TECHNO-FUNCTIONAL AI & DATA LEADER | ENTERPRISE TECHNOLOGY | DIGITAL TRANSFORMATION

Redmond, WA | 206-670-8569 | sh2036@outlook.com | linkedin.com/in/sunayana-h

UW MSIM | GPA 3.9/4.0 | STEM-DESIGNATED | BI & AI SPECIALIZATION | AUG 2026

PROFESSIONAL SUMMARY

Techno-functional enterprise technology leader with 15+ years translating complex business problems into technology solutions, launches, data-driven decisions, and measurable outcomes. Combines enterprise SaaS expertise across GRC, fintech, tax technology, ERP, APIs and integration with a UW M.S. in Information Management specializing in Business Intelligence & AI. Hands-on across application prototyping, data warehousing, SQL/Snowflake, BI, AI agents, RAG, LLM applications, analytics and responsible AI - bridging business and engineering from requirements through launch, adoption and scale.

KEY CAREER IMPACT

8 MAJOR LAUNCHES: 7 enterprise applications + 1 Government & Public Sector vertical | \$4.5M ARR: first Government & Public Sector customer on a recurring 5-year contract | 100% CLIENT RETENTION: legacy-product deprecation and migration | \$0 -> ~\$5M IN 1 YEAR: helped establish and scale ATEN India | ANALYST INFLUENCE: contributed to Gartner AR / Invoice-to-Cash category development and HighRadius Leader positioning

CORE CAPABILITIES

AI & AGENTIC SYSTEMS: LLMs, AI Agents, RAG, embeddings, vector databases, prompt engineering, AI evaluation, training, testing & responsible AI, human-AI interaction, AI prototyping

DATA & BI: SQL, Snowflake, data warehousing, data modeling, ETL/ELT concepts, Power BI, Tableau, Python, KPI design, analytics, data visualization, executive storytelling

TECHNO-FUNCTIONAL DELIVERY: Business analysis, requirements gathering, process/workflow mapping, solution design, APIs, integrations, UAT, Agile/Scrum, sprint planning, Jira/backlogs, customer discovery

ENTERPRISE & TRANSFORMATION: Enterprise SaaS, ERP, fintech, Accounts Receivable / Invoice-to-Cash, Treasury, tax technology, GRC, Audit/SOX, risk, Government & Public Sector, digital transformation

PROFESSIONAL EXPERIENCE

AVALARA | Product Marketing Manager | Seattle, WA

Aug 2022 - Jul 2024

- Hard-launched 3 enterprise tax technology applications and built the Government & Public Sector industry launch, operating across Product, Engineering, Sales, Customer Success, customer workflows, APIs/integrations, regulatory requirements, commercialization, and adoption.
- Converted the Government & Public Sector launch into immediate commercial impact by securing the vertical's first customer on a recurring 5-year contract worth \$4.5M ARR.
- Led a legacy-product deprecation and customer migration, coordinating technical and customer-facing teams to transition clients while achieving 100% client retention.
- Translated customer, market, usage, competitive, and regulatory signals into product requirements, roadmap inputs, Jira priorities, launch decisions, and executive recommendations.

HIGHRADIUS | Senior Manager, Product Marketing |

Jan 2021 - Jul 2022

Bangalore, India

- Hard-launched an enterprise fintech application and shaped strategy across Integrated Receivables, Treasury, and ERP-connected workflows, bridging customer requirements, product capabilities, integrations, adoption, and commercialization.
- Worked across Product, Engineering/Solutions, Sales, and customer stakeholders on ERP/API requirements, use cases, competitive intelligence, product narratives, adoption, and enterprise transformation.
- Contributed market, customer, and category intelligence to Gartner's Accounts Receivable / Invoice-to-Cash category development and analyst engagement that supported HighRadius's positioning as a Leader.

ATEN INTERNATIONAL | Marketing Manager | South

Jul 2018 - Jan 2021

Asia

- Helped establish ATEN's India subsidiary and scale the business from \$0 to approximately \$5M in revenue within one year through market creation, enterprise technology launches, channel development, customer acquisition, partnerships, and cross-functional execution.
- Led regional technology commercialization across South Asia/SAARC, aligning global Product, Sales, partners, customers, and local market requirements to build repeatable growth programs.

HFS RESEARCH | Senior Brand Strategist | Bangalore,*India***Jan 2017 - Jan 2018**

- Analyzed enterprise technology shifts spanning AI, automation, IoT, blockchain, and digital transformation and translated research into executive-facing insights and commercial programs; improved marketing effectiveness by 70% and increased leads by 38% in two quarters.

PROFESSIONAL EXPERIENCE, CONTINUED

METRICSTREAM | Assistant Manager, Product*Marketing | Bangalore, India***Mar 2012 - Jan 2017**

- Hard-launched 3 enterprise GRC applications spanning Audit, SOX Compliance, and Risk/Governance use cases, translating Fortune 500 customer, regulatory, control, workflow, and technology requirements into enterprise solutions and adoption.
- Led and supported requirements workshops, RFP/RFIs, product demonstrations, functional requirements, workflow recommendations, releases, upgrades, issue resolution, and cross-functional solution delivery.
- Bridged business stakeholders with Product and Engineering to identify process/control gaps, prioritize enhancements, and align enterprise GRC capabilities to measurable customer outcomes.

INATECH SOLUTIONS | Pre-Sales Executive - ERP &**CRM****2011 - 2012**

- Supported Microsoft and Oracle ERP/CRM pursuits through requirements analysis, solution mapping, RFP responses, demonstrations, technical/commercial proposals, and coordination across sales and delivery teams.

SELECTED AI, DATA & BI PORTFOLIO

- AI Undercover: Manipulation Hunter | UW iSchool Showcase Winner - Led approximately 90% of the end-to-end project from ideation and research design through full-stack working model, sampling, data collection, and behavioral analytics. Built a platform testing users' ability to detect manipulative conversational AI; 330 rounds across 33 players produced 56% overall accuracy, falling from 75% at beginner to 39.6% at expert difficulty.
- Data Warehouse & Retail Performance Analytics - Built secure SQL views in Snowflake to evaluate sales performance, targets, bonus allocation, demand patterns, and multi-location operations; translated warehouse data into decision-ready business analysis.
- Costco Business Intelligence Consulting - Developed a BI and data-strategy proposal spanning predictive supply-chain resilience, membership churn analytics, KPI design, and a unified cloud data warehouse roadmap.
- Confirmation Bias in AI Analytics - Co-led mixed-methods behavioral research examining how confirmation bias affects LLM-assisted analytics decisions and how awareness changes uncritical AI acceptance.
- AI / Zero-to-One Innovation - Built and competed with AI-enabled concepts across predictive operations, knowledge management, women's health, and digital storytelling; recognition includes 1st Place EY x Stanley 1913 Case Challenge, WE Lead x Lovable Solve-a-thon Winner, AIMS Product Competition Winner, Dempsey Startup Competition Finalist, and UW iStartup Lab Micro Grant.

UNIVERSITY OF WASHINGTON EXPERIENCE

Teaching Assistant / Reader-Grader | IMT 598G: Leading Transformation | 2026

- Supported graduate-level instruction through grading, instructional support, student engagement, and structured feedback in a course focused on organizational and technology transformation.

Housing & Food Services (HFS) | Student Staff | 2026

- Supported billing, Point-of-Sale (POS) and stock operations, processing transactions and assisting customer/payment workflows in a high-volume university environment.

EDUCATION

University of Washington, Information School - M.S., Information Management | Business Intelligence & Artificial Intelligence | STEM-designated | Aug 2026

University of Wales - MBA, Information Management / Marketing

Biju Patnaik University of Technology - B.Tech., Information Technology
